BACK TO THE VILLAGE!

International student workshop brought together architectural faculties from three different universities, namely Tsinghua from Beijing, Austrian TU Wien and University of Ljubljana from Slovenia with the aim of exchanging ideas 'in situ'. The workshop took place in March 2018, in Fujian Province. A picturesque mountain village Renshou located at the edge of a green bamboo forest, with beautiful views to the nearby valley, was selected as a case study. There, with an exception of a few old villagers in dire social circumstances, living in a partially preserved rural settlement of high quality, everything seemed completely deserted.

What sort of strategies and programs are available to revitalise rural Chinese settlement? Students from all three faculties exchanged ideas and proposed projects of various scales. The final presentation was held at TU Wien in June 2018. Now their ideas and proposals will be on view in Ljubljana.

Exhibition will be on display until June 20th, 2019
